

Downloading Forum Threads

Contributed by Purple Dragon

Hi all,

Just to let you know, we've been looking into ways to save some of the content of the forums for when the upgrade happens. After some looking, I found a feature that will let any user download a whole thread at once. I went ahead and activated it so all you need to do is click on the thread title, and at the top should be a new "button" called PDF. Just click on that and it should open a new window with the entire text of that thread in one PDF file that you can then save to your computer. I have already saved some stuff, and plan to do a bit more, but there is just too much to do it all. So if there is something that you particularly want a copy of, now is your chance.
